[Dissemination and exploitation workshop, Munich Germany](#) ^[1]

An InGeoCloudS dissemination and exploitation workshop was held on april 11 in Munich, Germany. All the members of the consortium were represented.

The one day workshop was quite short, but rather constructive. Indeed, the consortium refined the interesting functionalities that InGeoCloudS could offer to different end users.

The workshop gave also the opportunity to assess the results of the [InGeoCloudS' first Pilot](#)^[2] implementation.

The contributors went home with more work to do, but with the satisfaction from the job that has been achieved so far.
