## [2nd Experts Workshop has been completed](#) [1]

[The 2nd Experts Workshop in Brussels](#) [2] allowed the Consortium to present in details InGeoCloudS Pilot2, to perform some training on data and services integration and to discuss various topics addressed by the project (Cloud Computing, INSPIRE implementation, Linked Data,...). Several other european geosurveys could be represented (UK, Sweden, Poland, Germany,...).

We could also appreciate the fruitful contribution of 4 invited speakers who could present various facets of the European politics for the progress of geo-sciences.

**All details, downloadable presentations and training materials** can be found here: [2nd Experts Workshop in Brussels](#) [2]
